

**Official Drawing Paper for the
Water for Tomorrow
Student Calendar**

Twelve (12) illustrations from York Region students will be published annually in a calendar promoting the efficient use of water in York Region. Students are requested to prepare an illustration / drawing on a theme relating to water use in York Region. Illustrations should promote the benefits of improved use of water in the broader terms:

- reducing the amount of water we use in our homes, schools and/or businesses,
- improving the quality of water in our streams and lakes, and/or
- protecting water resources

For reasons of quality and consistency in printing the calendar submissions must be prepared on this paper only. Do not use fluorescent markers or sparkles in your illustrations, as they cannot be reproduced.

Submissions will be first judged at school level. Three entries will be selected by the teacher from each class, and submitted for judging to the Region.

The grand prize winner will receive \$100.00 and their illustration will be featured on the cover. The eleven other winning illustrations will each receive \$25.00.

The illustrations chosen for the calendar will become property of York Region and may be used for promotional purposes. The calendar will be available to download on our website www.waterfortomorrow.ca.
